

Virtual FISV Symposium on SARS-CoV-2 Biology and COVID-19

Current research and perspectives

16 September 2020

We are pleased to announce the virtual edition of the Congress of the Italian Federation of Life Sciences (FISV) on COVID19, which will take place on September 16, 2020.

Internationally renowned scientists from Italy and abroad will present their research on six different interdisciplinary topics, including from viral evolution, life cycle and structure, virus-host cell interactions, markers of diagnosis and pathology, as well as adaptive immunity and vaccines and drug treatment approaches.

Six short talks will be selected from the submitted abstracts and aligned with the topics of our invited speakers.

All participants will have ample opportunity to interact with the speakers as well as with their colleagues, ensuring exchange of knowledge and ideas.

Register by 4 September 2020 to save your space at the conference!

Registration is free, but the overall number of participants is limited to 500.

Contact: segreteria@fisv.org.

Main Topics

- **Phylogenesis and evolution of pathogenic beta-coronaviruses**
(SARS, MERS and bat/pangolin wild viruses)
Edward C Holmes
Graziano Pesole
Other speaker to be defined
- **Viral life cycle and structural biology**
Martin Walsh
Speakers to be defined
- **Virus-host cell interactions**
Susan Weiss
Other speakers to be defined
- **Markers of diagnosis and pathology**
Andrea Crisanti
Other speakers to be defined
- **Adaptive immunity and vaccines**
Andrea Carfi
Other speakers to be defined
- **Drug treatment approaches**
Speakers to be defined

Organizing Committee

Martino **Bolognesi**
Federico Manuel **Giorgi**
Gianni **Sava**
Gennaro **Ciliberto**
Paolo **Pinton**
Giovanna **Serino**
Raffaele **De Francesco**
Valeria **Poli**
